

3-Point Products,® Inc.

Instructions For Use - English (EN)

www.3pp-eifu.com

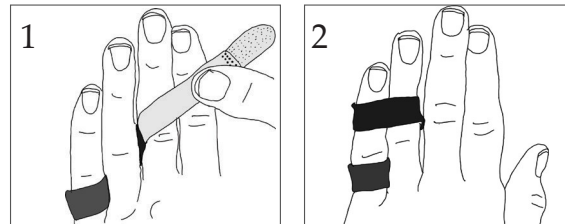

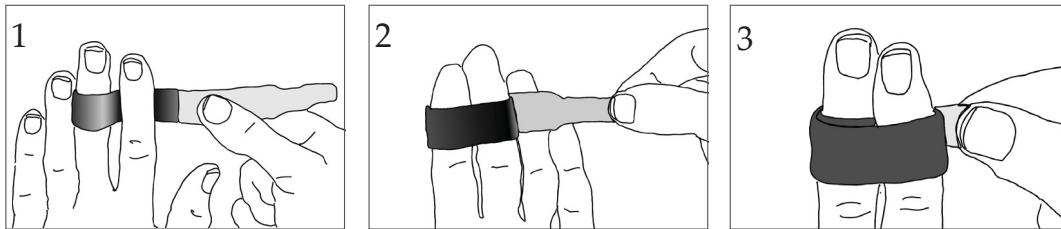

Description: A 3pp® Buddy Loop® supports and protects injured digits.

Intended Use: A flexible device designed to secure an injured digit to an adjacent digit for protection, to hold digits in proper alignment, facilitate motion and aid in healing.

Precautions: Not for use on open wounds. The device may cause skin irritation. Discontinue use if irritation occurs. Contact your health care provider if irritation persists. Follow cleaning guidelines and apply a clean wrap on a regular schedule. Discuss with healthcare provider prior to use if you have diabetes or reduced circulation.

Directions: How to apply

How Supplied: The product is manufactured out of nylon, Lycra® and foam. Materials are Latex-free. It is available in three sizes, packaged in various quantities. Do not use if the device is damaged. Store in a cool, dry place.

Cleaning: Hand wash and air dry the product regularly. Apply a clean product as needed according to conditions.

Disposal: The product is intended to be reusable on the same person multiple times. Discard the device if it shows signs of excessive wear and replace with a new product as necessary.

When to Consult a Healthcare Professional: Consult a healthcare professional if experiencing any adverse reaction to the device including skin reaction or changes in condition.

Notice to User and/or Patient: In the event of an adverse incident related to the device, remove the device and report the incident to the distributor and the Authorized Representative in the Member State in which the user resides.
