

3pp® Soft Finger Loops and Wraps

3pp® Buddy Loops®

Description

Non-slip, foam-lined 3pp® Buddy Loops® are the most effective way to secure fingers to protect or assist motion for **jammed or sprained fingers.**

Features

- Easy one-handed loop wrap
- Lined in soft, non-slip foam
- 3 sizes offer a range of support levels

3pp® Final Flexion Wrap™

1 size fits most

The adjustable 3pp® Final Flexion Wrap™ makes it easy to **restore end range DIP and PIP joint flexion.** Static progressive design puts the user in control to regain full finger flexion.

- Easily adjusted for progressive restoration of final PIP and DIP joint flexion
- Stretch foam lining eliminates fingernail pressure

3pp® Finger Trapper™

1 size fits most

The 3pp® Finger Trapper™ provides **secure application of traction** for post-op or dynamic splinting. **Eliminates the need for messy hooks, tape or glue.**

- Adjustable tension for a secure hold on the finger
- Non-slip foam lining distributes pressure over the nail
- Eyelet for easy attached of traction line

3pp® Buddy Loops®

1/2" (1.27 cm), 3/4" (1.9 cm) & 1" (2.5 cm)
All widths are 5" (12.7 cm) long
Pkg of 5, 25, 50 & 100

3pp® Finger Trapper™ (FT)

Length 3" (7.6 cm)
Width 3 5/8" (9.2 cm)
Pkg of 5 & 25

FAQ's

3pp® Buddy Loops®

What is the difference between the 3 sizes?

1/2" is recommended for smaller hands and for use during light activities. Use one or two to secure two fingers together.
3/4" is a good all around size and can be trimmed if necessary. Apply two for greater protection.
1" can be used on large hands and two can be used during sports or heavy duty job tasks.

Can Buddy Loops be used on the 4th and 5th digits?

Buddy Loops will secure the 4th and 5th digits by angling the loop.

3pp® Final Flexion Wrap™ (FFW)

How does this wrap work?

The FFW applies a static progressive force on the DIP and PIP joints to gradually increase IP flexion. Wearer can adjust the wrap to tolerance for optimal results and compliance.

How tight should the FFW be on the finger and how long should it be worn?

The FFW should be wrapped just tight enough to hold the joints at available end range of flexion. Recommended wearing time is 5 to 10 minutes and force can be adjusted as needed.

3pp® Finger Trapper™ (FT)

What can this wrap be used for?

The FT is recommended to replace fingernail hooks and glue or tape to apply finger traction for static progressive or dynamic orthoses.

How long can the FT stay on the finger?

While there is no limit on how long it can be worn, it's suggested it be removed for washing and a clean one applied if using it for long-term post-op traction.
